First Niles Financial, Inc.

55 North Main Street P.O. Box 311 Niles. Ohio 44446-0311

Ph. (330) 652-2539 ~ Fax: (330) 652-0911

March 25, 2022

To Our Stockholders:

This past year has been a busy one at your Company. In August 2021 we completed the acquisition of Union Capital Mortgage Corporation, ("UCMC") which operates as a wholly owned subsidiary and has offices in Westlake, Mentor and Hudson, all within the State of Ohio. This strategic acquisition resulted in record third quarter operating earnings for First Niles and expands our customer base into the lucrative and diverse Greater Cleveland economy.

The staff at UCMC is extremely experienced and all were retained in the acquisition. During 2021 UCMC originated over \$285 million in residential mortgage loans, with most being sold in the secondary market. A small percentage of originations are from time to time retained in the Company's loan portfolio.

As a result of the UCMC acquisition, we dramatically shifted our balance sheet from lower yielding investment securities to cash equivalents during late 2020 and most of 2021. This shift hurt our net interest spread but was necessary until we could better anticipate the funding needs of UCMC. More recently we have been shifting funds back to longer-term interest-bearing loans and investments as the mortgage market has slowed moderately and we have ample funds available to fund originations at UCMC. This asset shift should expand net interest spread and net interest margin in 2022.

In addition to actively managing UCMC, increasing the loan portfolio with quality credits continues to be among our other primary objectives at First Niles. Asset quality continued to improve throughout the year as nonperforming assets represented only 0.36% of total assets at year- end 2021, down from 0.67% at year-end 2020. Additionally, at year-end 2021, our allowance for loan losses to nonperforming loans was 128.13% as compared to 76.09% one year prior.

At December 31, 2021, stockholders' equity totaled approximately \$15.3 million, or 12.29% of total assets and our book value per common share was \$11.30. These levels still allow us to grow the balance sheet as well as provide ample funding capacity for UCMC.

We look forward to a successful 2022 and wish all our shareholders, customers and employees the very best in the coming year!

Sincerely,

/s/ Daniel E. Csontos

DANIEL E. CSONTOS

President and Chief Executive Officer

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Overview

First Niles Financial, Inc. ("First Niles" or the "Company") is a unitary, non-diversified holding company, headquartered in Niles, Ohio. First Niles has no significant operations outside those of its wholly owned operating subsidiary, Home Federal Savings and Loan Association of Niles ("Home Federal" or the "Bank" or the "Association"). References in this Annual Report to "we," "us," and "our" refer to First Niles and/or Home Federal as the context suggests or requires.

Home Federal is a \$124.5 million federal savings association. Our principal business consists of attracting retail deposits from the general public and investing those funds primarily in permanent and construction loans secured by first mortgages on one- to four-family residences. However, in the past several years we significantly increased our origination of permanent and construction loans secured by first mortgages on commercial and multi-family real estate. To a lesser extent, we originate consumer and commercial business loans. Historically, we have borrowed funds from the Federal Home Loan Bank of Cincinnati ("FHLB") and reinvested the proceeds in investment securities at generally favorable interest rate spreads. More recently these borrowings have been used for general liquidity purposes, including the origination of the types of loans as described above.

On August 2, 2021, the Company acquired 100% of the outstanding equity interest of Union Capital Mortgage Corporation ("Union Capital") for \$3.3 million in cash and stock. Union Capital is a mortgage banking company that provides residential mortgage loans to the general public and sells them in the secondary market. Union Capital will continue to conduct its mortgage banking business from offices located in Mentor, Westlake and Hudson, Ohio.

The acquisition of Union Capital will expand our presence in northeast Ohio and help diversify our business model as the level of competition in our market area is strong and dominated by commercial banks, credit unions and other financial institutions of varying sizes and characteristics. Current economic conditions and strong competition have the potential to limit loan demand. In the event current economic and market conditions persist or worsen, and loan demand weakens, we cannot give any assurances that we will be able to maintain or increase our mortgage loan portfolio, which could adversely affect our operations and financial results.

Our results of operations depend primarily on net interest income, which is determined by (i) the difference between rates of interest we earn on interest-earning assets, consisting primarily of mortgage loans, collateralized mortgage obligations and other investments, and the rates we pay on interest-bearing liabilities, consisting primarily of deposits and borrowings; and (ii) the relative amounts of our interest-earning assets and interest-bearing liabilities. The level of noninterest income, such as gain on sale of loans, fees received from customer deposit account service charges and gains on sales of investments, and the level of noninterest expense, such as federal deposit insurance premiums, salaries and benefits, office occupancy costs, and data processing costs, also affect our results of operations. Finally, our results of operations may also be affected significantly by general economic and competitive conditions, including changes in market interest rates, loan demand, government policies and actions of regulatory authorities, all of which are beyond our control.

Short term market interest rates remained near or at historical lows during 2021, due to Federal Reserve Board Open Market Operations in response to economic events related to the COVID-19 pandemic. However, due to various increasing inflationary pressures, longer term interest rates rose moderately during the latter part of the year, resulting in an upsloping yield curve. This environment could have a positive impact on our results of operations as our balance sheet is asset sensitive, which means our interest-earning assets generally reprice more frequently than our interest-bearing liabilities. In such a situation, the spread between our interest-earning assets and our interest-bearing liabilities would be expected to increase. However, this environment could change quickly if the Federal Reserve Board decides to start increasing short term interest rates to combat these inflationary pressures. Additionally, our existing level of nonaccrual loans, or any increase in this level, negatively impacts the results of operations, regardless of the interest rate environment. The cost of compliance with increased government regulation, especially in recent years has also negatively impacted our operating expenses and thus our earnings.

As of December 31, 2021, nonperforming loans totaled 0.61% of net loans receivable. Nonperforming assets represented 0.36% of total assets at year- end 2021. At such date, our allowance for loan losses to nonperforming loans was 128.13% and to net loans receivable was 0.78%. At December 31, 2021, we were in compliance with all applicable regulatory capital requirements and remain a "well-capitalized" institution.

The following tables, beginning on the next page, set forth selected consolidated financial information for the periods reported.

Critical Accounting Policies

Allowance for Loan Losses. The allowance for loan losses is a significant estimate that can and does change based on management's assumptions about specific borrowers and current general economic and business conditions, among other factors. Management reviews the adequacy of the allowance for loan losses no less frequently than on a quarterly basis. The evaluation of adequacy by management includes consideration of past loss experience, changes in the composition of the loan portfolio, the current condition and amount of loans outstanding, identified problem loans, information about specific borrower situations and estimated collateral values, among other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged off. Loan losses are charged against the allowance when management believes that the un-collectability of a loan balance is substantiated.

Securities. Securities are classified as held to maturity or available for sale on the date of purchase. Only those securities classified as held to maturity, and which management has both the intent and ability to hold to maturity, are reported at amortized cost. Available-for-sale securities are reported at fair value with unrealized gains and losses, net of related deferred income taxes, included in accumulated other comprehensive income on the Consolidated Balance Sheet. The fair value of a security is determined based on quoted market prices. Realized gains and losses are reported within noninterest income in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. Available-for-sale and held-to-maturity securities are reviewed quarterly for possible other-than-temporary impairment. The review includes an analysis of the facts and circumstances of each individual investment, such as the severity of loss, the length of time the fair value has been below cost, the expectation for that security's performance, the creditworthiness of the issuer and our intent and ability to hold the security. A decline in value that is considered to be other-than-temporary impairment is recorded as a loss within noninterest income in the Consolidated Statements of Income. The price movements within our securities portfolio are primarily dependent upon the movement in interest rates, particularly given the minimal inherent credit risk of these securities.

Business Combinations. Business combinations are accounted for by applying the acquisition method. As of acquisition date, the identifiable assets acquired and liabilities assumed are measured at fair value and recognized separately from goodwill. Results of operations of the acquired entities are included in the consolidated statement of income from the date of acquisition. The calculation of intangible assets including core deposits and the fair value of loans are based on significant judgments. Core deposits intangibles are calculated using a discounted cash flow model based on various factors including discount rate, attrition rate, interest rate, cost of alternative funds and net maintenance costs.

Loans acquired in connection with acquisitions are recorded at their acquisition-date fair value with no carryover of related allowance for credit losses. Any allowance for loan loss on these pools reflect only losses incurred after the acquisition (meaning the present value of all cash flows expected at acquisition that ultimately are not to be received). Determining the fair value of the acquired loans involves estimating the principal and interest cash flows expected to be collected on the loans and discounting those cash flows at a market rate of interest. Management considers a number of factors in evaluating the acquisition-date fair value including the remaining life of the acquired loans, delinquency status, estimated prepayments, payment options and other loan features, internal risk grade, estimated value of the underlying collateral and interest rate environment.

Financial Condition

The following discussion compares our consolidated financial condition at December 31, 2021 to December 31, 2020 and the results of operations for the year ended December 31, 2021 with the year ended December 31, 2020. This discussion should be read in conjunction with the consolidated financial statements and footnotes included herein.

Assets totaled \$124.5 million at December 31, 2021, an increase of \$14.8 million from December 31, 2020. Cash and cash equivalents increased \$3.9 million and net loans receivable increased \$2.0 million during 2021. Total investment securities increased \$3.0 million during the year. As of December 31, 2021, investment securities were comprised of \$9.5 million in securities available for sale and \$1.3 million in securities held to maturity. Home Federal also had \$1.3 million in FHLB stock as of December 31, 2021, unchanged from year-end 2020.

Our loan portfolio increased \$2.0 million, or 2.8%, to \$73.8 million at December 31, 2021, as compared to \$71.8 million at December 31, 2020. Specifically, loans secured by one- to four-family properties, our largest loan category, increased \$1.4 million and ended the year with a balance of \$43.0 million. Commercial real estate loans, which includes loans secured by multi-family properties, decreased \$2.8 million, ending the year with a balance of \$17.7 million. Home equity lines of credit ended the year at \$1.7 million, \$0.4 million less than at December 31, 2020. Loans for construction and development increased \$4.5 million ending the year with a balance of \$8.5 million. Commercial and industrial loans decreased \$0.7 million during the year, ending with a balance of \$3.3 million. Deposit secured loans decreased \$2,000 during the year, ending the year with a balance of \$82,000. The allowance for loan losses increased \$20,000 during 2021 and ended the year at \$577,000.

Deposits totaled \$80.6 million at December 31, 2021, compared to \$66.3 million at December 31, 2020, an increase of \$14.3 million, or 21.6%. During the year ended December 31, 2021, savings, demand and NOW accounts collectively increased \$5.0 million and certificates of deposit increased \$9.4 million.

FHLB advances totaled \$27.1 million at December 31, 2021 as compared to \$30.0 million at December 31, 2020. At December 31, 2021, these FHLB advances were comprised of 18 different contracts. Fifteen advances, totaling \$24.0 million, have original maturities greater than one year, have fixed interest rates and remaining maturities ranging from January 2022 through June 2039. These advances may have a prepayment penalty if paid prior to maturity, depending on pre-established contractual terms, as set by the FHLB.

The advances from the FHLB have been used for general liquidity purposes, including originating loans and funding deposit withdrawals. See Note 11 of the Notes to Consolidated Financial Statements contained in this Annual Report to Stockholders for additional information on our FHLB advances. At December 31, 2021 the Company had \$116,000 in other borrowings related to a commitment to fund an investment in an Affordable Housing Tax Credit Fund.

Total equity at December 31, 2021 was \$15.3 million, or 12.3% of total assets. This was \$2.4 million greater than at year-end 2020. The increase in total equity during the year was attributable to a \$2.6 million decrease in treasury stock, and a \$287,000 increase in retained earnings.

During 2021 the Company did not repurchase any common or preferred shares. During 2020 the Company repurchased 325 preferred shares at a total cost of \$3,200 or \$9.88 per share. As of

December 31, 2021, there was a share repurchase program in progress authorizing the purchase of up to 3.0% of the Company's outstanding common shares and another program authorizing the purchase of up to 10.0% of the Company's class A preferred shares. As of December 31, 2021, 13,745 common shares and 2,254 preferred shares had been purchased as part of the respective authorizations. During the third quarter of 2021, the Company issued 220,000 shares from treasury for a total of \$2.2 million or \$10.12 per share for the purchase of Union Capital. At December 31, 2021 and 2020 there were 1,333,067 and 1,113,067 shares of common stock outstanding, respectively. Preferred shares outstanding were 21,737 at December 31, 2021 and 2020.

Results of Operations

Net Income. The Company recorded net income of \$586,000 for the year ended December 31, 2021, an increase of \$284,000 from 2020. The increase in net income was primarily due to a \$3.3 million increase in noninterest income and a \$134,000 decrease in the provision for loan losses, partially offset by a \$3.0 million increase in noninterest expense, an \$88,000 decrease in net interest income and an increase of \$78,000 in federal income tax expense.

Our return on average assets was 0.50% for the year ended 2021, compared to 0.29% for the year ended 2020. Return on average equity was 4.21% for 2021, compared to 2.30% for 2020. Average equity to average assets was 11.96% for the year ended 2021, compared to 12.45% for the year ended 2020. In 2021 we paid annual, aggregate, regular quarterly dividends on common stock totaling \$293,000, or \$0.24 per share, and annual, aggregate, regular quarterly dividends on preferred stock totaling \$6,000, or \$0.28 per share. In 2020 we paid annual, aggregate, regular quarterly dividends on common stock totaling \$267,000, or \$0.24 per share, and annual, aggregate, regular quarterly dividends on preferred stock totaling \$6,000, or \$0.28 per share.

Net Interest Income. Net interest income for the year ended December 31, 2021 was \$2.2 million, an \$88,000 decrease from the year ended December 31, 2020. Our net interest spread during 2021 was 2.00%, an 13 basis point decrease from the 2.13% spread experienced during 2020. On a tax-equivalent basis the net interest spread during 2021 was 2.00%, a decrease of 17 basis points from 2.17% in 2020. Net interest margin decreased 20 basis points to 2.04% during 2021 from 2.24% in 2020. On a tax-equivalent basis net interest margin was 2.04% during 2021, as compared to 2.27% in 2020, a decrease of 23 basis points.

Average interest-earning assets increased to \$105.5 million during 2021 from \$100 million during 2020. The increase in average interest-earning assets primarily consisted of a \$4.5 million increase in the average balance of loans, and an \$8.2 million increase in the average balance of interest-bearing deposits, partially offset by an \$8.1 million decrease in the average balance of mortgage-backed and related securities. The overall yield on interest earning assets decreased 43 basis points, from 3.54% in 2020 to 3.11% in 2021, on a tax-equivalent basis.

The yield on our portfolio of loans receivable decreased 32 basis points during the past year, from 4.32% in 2020 to 4.00% in 2021. The yield on our mortgage-backed and related securities portfolio decreased 68 basis points on a year-to-year comparative basis from 2.02% to 1.34%. Our taxable investment securities portfolio experienced an 81 basis point decrease from 3.32% in 2020 to 2.51% in 2021. We did not have any tax-exempt investment securities in 2021. Adjustable-rate loans comprised approximately 64.2% of our gross loan portfolio at December 31, 2021.

The \$9.7 million increase in average interest-bearing liabilities was primarily comprised of and a \$9.0 increase in average certificates of deposit, a \$3.0 million increase in savings deposits and a \$1.9 million increase in transaction accounts, partially offset by a \$4.1 million decrease in average borrowings. Total interest expense was \$1.1 million in 2021 and 2020. Overall, our cost of funds decreased 26 basis points from 1.37% during 2020 to 1.11% during 2020. During 2021, the weighted-average interest rate of our FHLB advances was 2.25%, 13 basis points higher than in 2020. Our cost of deposits decreased 29 basis points, from 1.00% during 2020 to 0.71% during 2021. The average rate paid on our certificate of deposit accounts, our largest category of deposit accounts, decreased 57 basis points, from 1.75% in 2020 to 1.18% in 2021. The average rate of interest paid on savings deposits and NOW accounts decreased 1 basis point from 2020 to 2021.

See the tables below captioned "Average Balances, Interest Rates and Yields" and "Rate/Volume Analysis of Net Interest Income" for more detailed information regarding our net interest income.

Average Balances, Interest Rates and Yields

The following table presents for the periods indicated the total dollar amount of interest income from average interest-earning assets and the resultant yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, using monthly average balances.

Rate/Volume Analysis of Net Interest Income

The following table presents the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities. It distinguishes between the changes related to outstanding balances and those due to the changes in interest rates. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (1) changes in volume (*i.e.*, changes in volume multiplied by old rate) and (2) changes in rate (*i.e.*, changes in rate multiplied by old volume). For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately to the change due to volume and the change due to rate.

Provision for Loan Losses. Our provision for loan losses, which is the amount charged against income to increase the allowance for loan losses, was \$20,000 for the year ended December 31, 2021 as compared to \$154,000 for the year ended December 31, 2020. Nonperforming loans, which are defined as nonaccruing loans as well as loans delinquent more than 90 days and still accruing interest, decreased by \$282,000, to \$450,000 at December 31, 2021, from \$732,000 at December 31, 2020. Our nonperforming loans totaled 0.61% of net loans receivable at December 31, 2021, compared to 1.02% of net loans receivable at December 31, 2021, representing 128.13% of nonperforming loans and 0.78% of net loans receivable. At December 31, 2020 the allowance for loan losses was \$557,000, representing 76.09% of nonperforming loans and 0.78% of net loans receivable. At December 31, 2021 we had no real estate owned which was unchanged from December 31, 2020.

It is our policy to provide valuation allowances for estimated losses on loans based upon past loss experience, current trends in the level of delinquent and specific problem loans, loan concentrations to single borrowers, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, and current and anticipated economic conditions in our market area. Accordingly, the calculation of the adequacy of the allowance for loan losses is not based directly on the level of nonperforming assets.

Our methodology for determining the sufficiency of our allowance for loan losses primarily focuses on two separate areas of our loan portfolio. The first part of our analysis considers all classified and criticized loans as determined by regulatory standards and assigns a specific estimated loss, if any, to the balance of each classified and criticized loan based on management's judgment. The second part of our analysis focuses on the historical loss experience of the Association over the past three years on the remaining portion of the portfolio. Our analysis also considers other factors, including the overall loan portfolio delinquency trend, current and forecasted local economic conditions, management's adherence to established underwriting guidelines and the level of nonperforming loans in relation to the allowance for loan losses. Each component of our analysis is added together and compared, on a quarterly basis, to our overall allowance for loan losses. Adjustments are made to the allowance for loan losses through the provision for loan losses any time our analysis indicates a difference of \$25,000 or greater.

We will continue to monitor our allowance for loan losses and make future adjustments to the allowance through the provision for loan losses as economic conditions dictate. Although we maintain our allowance for loan losses at a level which management considers to be adequate to provide for losses, there can be no assurance that future losses will not exceed estimated amounts or that additional provisions for loan losses will not be required in future periods. In addition, our determination as to the amount of the allowance for loan losses is subject to review by the Office of the Comptroller of the Currency, as part of its examination process, which may result in the establishment of an additional allowance.

Noninterest Income. Noninterest income increased to \$3.51 million for the year ended December 31, 2021 from \$213,000 for the year ended December 31, 2020. During 2021, noninterest income included \$3.40 million net gain on sale of loans, \$37,000 in service fees and other income, and \$67,000 in accrued income from bank owned life insurance. During 2020, noninterest income included \$29,000 in service fees and other income, \$65,000 in accrued income from bank owned life insurance, \$92,000 from loss on sale of real estate owned and \$211,000 from gain on sale of investments.

Noninterest Expense. Noninterest expense increased \$2.98 million for the year ended December 31, 2021 as compared to the year ended December 31, 2020. The increase was directly related to the operations of Union Capital Mortgage Corporation. The increase was primarily due to a \$2.55 million increase in compensation and benefits, a \$95,000 increase in occupancy and equipment and a \$298,000 increase in other operating expense.

Federal Income Taxes. The provision for federal income taxes was \$132,000 for the year ended December 31, 2021, a \$78,000 increase from the \$54,000 expense recorded in 2020. See Note 10 of the Notes to Consolidated Financial Statements contained in this Annual Report to Stockholders.

Asset and Liability Management; Market Risk Analysis

As stated above, we derive our income primarily from the excess of interest collected over interest paid. The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. However, market interest rates change over time and our results of operations, like those of many financial institutions, are impacted by these changes and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is among Home Federal's most significant market risks.

Our operations are also affected by our level of noninterest income and expenses. Noninterest income includes net gain on sale of loans, service charges and fees and gain on sale of investments. Noninterest expenses primarily include compensation and benefits, occupancy and equipment expenses, deposit insurance premiums, legal, compliance and data processing expenses. Our results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government legislation and regulation, and monetary and fiscal policy.

In an attempt to manage our exposure to changes in interest rates and comply with applicable regulations, we monitor Home Federal's interest rate risk. In monitoring interest rate risk, we continually analyze and manage our assets and liabilities based on their payment streams and interest rates, the timing of their maturities, and their sensitivity to actual or potential changes in market interest rates.

An asset or liability is interest rate sensitive within a specific time period if it will mature or reprice within that time period. If our assets mature or reprice more rapidly or to a greater extent than our liabilities, then the market value of our portfolio equity and our net interest income would tend to increase during periods of rising interest rates and decrease during periods of falling interest rates. Conversely, if our assets mature or reprice more slowly or to a lesser extent than our liabilities, then the market value of our portfolio equity and our net interest income would tend to decrease during periods of rising interest rates and increase during periods of falling interest rates. Our policy has been to address the interest rate risk inherent in our business of originating long-term loans funded by short-term deposits by maintaining sufficient liquid assets for material and prolonged changes in interest rates. We believe that our liquidity position and capital levels, which are well in excess of regulatory requirements, assist us in reasonably limiting the effects of our interest rate risk exposure.

Our Board of Directors is responsible for reviewing our asset and liability position. The Board performs a quarterly review of interest rate risk and trends, liquidity and capital ratios and related regulatory requirements. In addition, the Board reviews simulations of the effect of changes in interest rates on Home Federal's capital, net interest income and net income under various interest rate scenarios. Management of Home Federal is responsible for implementing the policies and decisions of the Board of Directors with respect to our asset and liability goals and strategies.

To manage the interest rate risk, we attempt to originate adjustable-rate loans. At December 31, 2021, adjustable-rate mortgage loans, including home equity lines of credit, totaled \$49.0 million, or 64.2% of our total gross loan portfolio. We also maintain a portfolio of liquid assets which includes investment securities. Maintaining liquid assets, however, tends to reduce potential net income because liquid assets usually provide a lower yield than other interest-earning assets, such as

loans. Based on our current balance sheet structure, we are more vulnerable to decreases in interest rates than to increases in interest rates, given current market interest rate levels and trends, as illustrated in the table below.

The following table sets forth the change in Home Federal's economic value of equity at December 31, 2021, based on independent models, and to a lesser extent, internal assumptions that would occur upon an immediate change in interest rates of up to 300 basis points, with no effect given to any steps that management might take to counteract that change. Economic value of equity is the present value of expected cash flows from assets, liabilities and off-balance sheet contracts.

December 31, 2021

						Economic Value of Equity as %				
		Eco	nomic	Value of Equit	<u>y</u>	of the Economic V	alue of Total Assets			
Change				\$	%					
in Rate	A	mount		Change	Change	EVE Ratio	BP Change			
				(Do	llars in Thousa	ands)				
+300	\$	16,067	\$	(1,163)	-6.7%	12.86%	(93)			
+200		16,561		(669)	-3.9%	13.25%	(54)			
+100		16,791		(439)	-2.5%	13.44%	(35)			
		17,230				13.79%				
-100		16,448		(782)	-4.5%	13.16%	(63)			
-200		NM		NM	NM	NM	NM			
-300		NM		NM	NM	NM	NM			

NM = Not meaningful because some market interest rates would compute to a rate less than zero.

In the above table, the first column on the left presents the basis point increments of parallel yield curve shifts. The second column presents the overall dollar amount of economic value of equity at each basis point increment. The third and fourth columns present Home Federal's actual position in dollar change and percentage change in economic value of equity at each basis point increment. The remaining columns present Home Federal's percentage change and basis point change in its economic value of equity as a percentage of the economic value of total assets. At December 31, 2021, Home Federal was within the economic value of equity interest rate risk policy limit established by its Board of Directors. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including interest rates, loan prepayments, deposit decay rates, and the market values of certain assets under the various interest rate scenarios and should not be relied upon as indicative of actual results. Certain shortcomings are inherent in the method of analysis presented in the computation of economic value of equity. Although certain assets and liabilities may have similar maturities or periods within which they reprice, they may react differently to changes in market interest rates. The interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. In the event of a change in interest rates, prepayments and early withdrawal levels could deviate significantly from those assumed in making the calculations set forth above.

Liquidity and Commitments

Home Federal's primary sources of funds are deposits, repayments and prepayments of loans and securities and interest income. Although maturity and scheduled amortization of loans and securities are relatively predictable sources of funds, deposit flows and prepayments on loans and securities are influenced significantly by general interest rates, economic conditions and competition. Historically, we have been able to generate sufficient cash through our deposits and have only utilized borrowings to a limited degree for liquidity purposes.

Liquidity management is an ongoing and long-term function of our asset/liability management strategy. Excess funds generally are invested in interest-bearing overnight deposits at other financial institutions and in short-term investment securities. If we require funds beyond our ability to generate deposits, additional sources of funds are available. Our most liquid assets are cash and cash equivalents. At December 31, 2021, cash and cash equivalents totaled \$26.5 million compared to \$22.7 million at December 31, 2020. The increase in liquidity was related to the acquisition of Union Capital Mortgage Corporation and the forecasted needs of their funding requirements. We monitor and review liquidity regularly and maintain short-term, unsecured lines of credit with two different commercial banks which can be accessed immediately. These unsecured lines of credit aggregate \$7.0 million. Home Federal also maintains a \$2.5 million secured line of credit with another depository financial institution that is immediately available for longer term financing needs. All three lines of credit had no funds drawn as of December 31, 2021. Additionally, we have the ability to borrow funds from the FHLB of Cincinnati. At December 31, 2021, we had \$14.8 million in unused borrowing capacity from the FHLB of Cincinnati.

At December 31, 2021, we had commitments to fund \$1.9 million in construction loans. At this date, we had no investment security purchase commitments outstanding and no performance standby letters of credit outstanding. The unused portion of home equity lines of credit was \$1.6 million and the unused portion of commercial lines of credit was \$1.3 million. Certificates of deposit scheduled to mature in one year or less at December 31, 2021 totaled \$35.8 million. Based on historical experience, we believe that a significant portion of maturing deposits will remain with us. We believe, based on our current balance sheet structure and our ability to acquire funds from various sources, that our liquidity is adequate.

Capital

Total equity was \$15.3 million at December 31, 2021, or 12.3% of total assets on that date. Consistent with our goals to operate a sound and profitable financial organization, we actively seek to maintain a "well-capitalized" institution in accordance with regulatory standards. As of December 31, 2021, Home Federal exceeded all capital requirements of the Office of the Comptroller of the Currency. Our regulatory capital ratios at December 31, 2021 were as follows: Tier 1 (leverage) capital, 10.74%; Tier 1 risk-based capital, 18.23%; and Total risk-based capital, 19.04%. The regulatory capital requirements to be considered well capitalized are 5.0%, 8.0%, and 10.0%, respectively.

Impact of Inflation and Changing Prices

The financial statements and related data presented herein have been prepared in accordance with generally accepted accounting principles which require the measurement of financial position and operating results in terms of historical dollars without considering changes in the relative purchasing power of money over time due to inflation. The primary impact of inflation on our operations is reflected in increased operating costs. Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates, generally, have a more significant impact on a financial institution's performance than does inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

Disclosure Regarding Forward-Looking Statements

First Niles and Home Federal may from time to time make written or oral "forward-looking statements." These forward-looking statements may be contained in this Annual Report to Stockholders, in our proxy statement for our annual meeting and in other communications by us, which are made in good faith pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. The words "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" and similar expressions are intended to identify forward-looking statements.

Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions that are subject to significant risks and uncertainties. The following factors, many of which are subject to change based on various other factors beyond our control, could cause our financial performance to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements:

- the strength of the United States economy in general and the strength of the local economies in which we conduct our operations;
- the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Federal Reserve Board;
- inflation, interest rate, market and monetary fluctuations;
- the timely development of and acceptance of new products and services of Home Federal and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors' products and services;
- the willingness of users to substitute competitors' products and services for our products and services;
- the success of Home Federal in gaining regulatory approval of its products and services, when required;
- the impact of changes in financial services laws and regulations (including laws concerning taxes, banking, securities and insurance);
- the impact of technological changes;
- acquisitions;
- changes in consumer spending and savings habits; and

• our success at managing the risks involved in the foregoing.

The foregoing list of important factors is not exclusive. We do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of First Niles or Home Federal.

INDEPENDENT AUDITOR'S REPORT

Board of Directors and Stockholders First Niles Financial, Inc. Niles, Ohio

Opinion

We have audited the accompanying consolidated financial statements of First Niles Financial, Inc. and its subsidiary (the "Company"), which comprise the consolidated statements of financial condition as of December 31, 2021 and 2020; the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for the years then ended; and the related notes to the consolidated financial statements (collectively, the financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are issued or available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant
 accounting estimates made by management, as well as evaluate the overall presentation of the
 financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Information Included in the Annual Report

Management is responsible for the other information included in the annual report. The other information comprises the President's Message, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Stockholder Information but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or whether the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

FIRST NILES FINANCIAL, INC. AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

First Niles Financial, Inc. (the "Company") is a savings and loan holding company whose activities are primarily limited to holding the stock of the Home Federal Savings and Loan Association of Niles (the "Association"). The Company conducts a general banking business in Niles, Ohio, which consists of attracting deposits from the general public and applying those funds to the origination of loans for residential, commercial, and consumer purposes. On August 2, 2021, the Association acquired Union Capital Mortgage Corporation, a mortgage banking company operating principally in northern Ohio, that provides residential mortgage loans to the general public and sells them in the secondary market.

Use of Estimates

The consolidated financial information presented herein has been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). In preparing consolidated financial statements in accordance with U.S. GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from such estimates. A material estimate that is particularly susceptible to significant change in the near term relates to the determination of the allowance for loan losses, deferred taxes, and fair value of financial instruments.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and the Association. All significant intercompany balances and transactions have been eliminated in consolidation.

Cash and Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents includes both noninterest and interest-bearing cash, which includes cash on hand and amounts due from the correspondent banks with an original maturity of 90 days or less.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentration of credit risk consist of cash investments in excess of federally insured limits. The Company places its temporary cash with high credit quality financial institutions. At December 31, 2021 and 2020, there were balances of \$16,656,000 and \$500,000, respectively, in excess of the FDIC insured limit of \$250,000.

Investment Securities and Mortgage-Backed and Related Securities

The Company categorizes its investment securities as held to maturity or available for sale. Held-to-maturity securities are those securities for which the Company has the ability and intent to hold until maturity. Securities classified as held to maturity are carried at cost, adjusted for amortization of premiums and accretion of discounts using methods that approximate the interest method over the remaining period to contractual maturity, and adjusted for anticipated prepayments.

Securities classified as available for sale are those debt securities that the Company intends to hold for an indefinite period of time but not necessarily to maturity. Any decision to sell securities classified as available for sale would be based on various factors, including significant movement in interest rates, changes in the maturity mix of the Company's assets and liabilities, liquidity needs, regulatory capital consideration, and other similar factors. Securities designated as available for sale are carried at fair value with resulting unrealized gains or losses recorded to equity. Realized gains or losses on sales of securities are recorded on the trade date and are recognized using the specific identification method. Management evaluates securities for other than temporary impairment on a quarterly basis or more frequently as economic and market conditions warrant such an evaluation.

Loans

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff generally are reported at their principal amount net of the allowance for loan losses. Interest on loans is recognized as income when earned on the accrual method. The Company's policy is to discontinue the accrual of interest on loans when payments are 90 days past due unless in management's estimation interest collection is probable based upon economic and business conditions of the borrower. Payments received on nonaccrual loans are recorded as income or applied against principal according to management's judgment as to the collectability of such principal. Loans are returned to accrual status when past-due interest is collected and the collection of principal is probable.

Loan origination fees and certain direct loan origination costs are being deferred and amortized as an adjustment of the related loan's yield.

Loan origination fees received net of direct origination costs, are deferred and amortized to interest income over the contractual lives of the loans using the level-yield method, giving effect to actual loan prepayments. Loan origination costs are the direct costs attributable to originating a loan. Total net unamortized costs of \$337,000 and \$402,000 are carried with outstanding loan balances at December 31, 2021 and 2020, respectively.

Loans Held for Sale

Certain newly originated mortgage loans are classified as held for sale because it is management's intent to sell these residential mortgage loans. These residential mortgage loans held for sale are carried at the lower of aggregate cost or fair value.

Allowance for Loan Losses

The allowance for loan losses represents the amount that management estimates is adequate to provide for probable losses inherent in its loan portfolio. The allowance method is used in providing for loan losses. Accordingly, all loan losses are charged to the allowance, and all recoveries are credited to it. The allowance for loan losses is established through a provision for loan losses that is charged to operations. The provision is based on management's periodic evaluation of the adequacy of the allowance for loan losses, which encompasses the overall risk characteristics of the various portfolio segments, past experience with losses, the impact of economic conditions on borrowers, and other relevant factors.

The estimates used in determining the adequacy of the allowance for loan losses, including the amounts and timing of future cash flows expected on impaired loans, are particularly susceptible to significant change in the near term.

Allowance for Loan Losses (Continued)

A loan is considered impaired when it is probable the borrower will not repay the loan according to the original contractual terms of the loan agreement. Management has determined that residential real estate and all consumer loans represent large groups of smaller-balance homogeneous loans that are to be collectively evaluated. Loans that experience insignificant payment delays, which are defined as 90 days or less, generally are not classified as impaired. A loan is not impaired during a period of delay in payment if the Company expects to collect all amounts due, including interest accrued at the contractual interest rate for the period of delay. All loans identified as impaired are evaluated independently by management. Management determines the significance of payment delays on a case-by-case basis, taking into consideration all circumstances concerning the loan, the creditworthiness and payment history of the borrower, the length of the payment delay, and the amount of shortfall in relation to the principal and interest owed. The Company estimates credit losses on impaired loans based on the present value of expected cash flows or the fair value of the underlying collateral if the loan repayment is expected to come from the sale or operation of such collateral. Impaired loans, or portions thereof, are charged off when it is determined a realized loss has occurred. Until such time, an allowance for loan losses is maintained for estimated losses. Cash receipts on impaired loans are applied first to accrued interest receivable unless otherwise required by the loan terms, except when an impaired loan is also a nonaccrual loan.

Management establishes the allowance for loan losses based upon its evaluation of the pertinent factors underlying the types and quality of loans in the portfolio. Commercial loans and commercial real estate loans are reviewed on a regular basis, with a focus on larger loans along with loans that have experienced past payment or financial deficiencies. Larger commercial loans and commercial real estate loans that are 90 days or more past due are selected for impairment testing. These loans are analyzed to determine whether they are impaired, which means that it is probable that all amounts will not be collected according to the contractual terms of the loan agreement. All commercial loans that are delinquent 90 days and residential mortgage loans that are 90 days delinquent and are placed on nonaccrual status are classified on an individual basis. The remaining loans are evaluated and classified as groups of loans with similar risk characteristics. The Company allocates allowances based on the factors described below, which conform to the Company's asset classification policy. In reviewing risk within the Bank's loan portfolio, management has determined there to be several different risk categories within the loan portfolio. The allowance for loan losses consists of amounts applicable to: (i) the commercial loan portfolio, (ii) the commercial real estate portfolio, (iii) the consumer loan portfolio, and (iv) the loans secured by residential real estate portfolio. Factors considered in this process included general loan terms, collateral, and availability of historical data to support the analysis. Historical loss percentages for each risk category are calculated and used as the basis for calculating allowance allocations. Certain qualitative factors are then added to the historical allocation percentage to get the total factor to be applied to nonclassified loans. The following qualitative factors are analyzed:

- Levels of and trends in delinquencies
- Trends in volume and terms
- Changes in lending policy and procedures
- Changes in management and lending staff
- Economic trends
- Concentrations of credit
- Changes in underlying collateral value

The Company analyzes its loan portfolio each quarter to determine the appropriateness of its allowance for loan losses.

Federal Home Loan Bank Stock

Federal Home Loan Bank of Cincinnati (FHLB) stock is carried at cost, classified as a restricted security because no ready market exists for this investment, it has no quoted market value, and it is periodically reviewed for impairment based on ultimate recovery of par value. At December 31, 2021, the Company does not consider the stock to be impaired.

Bank-Owned Life Insurance (BOLI)

The Company has purchased life insurance policies on certain key officers and directors. Bank-owned life insurance is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Premises and Equipment

Land is carried at cost, premises and equipment are recorded at cost and include expenditures, which extend the useful lives of existing assets. Maintenance, repairs, and minor renewals are expensed as incurred. For financial reporting, depreciation is provided on the straight-line method over the estimated useful lives of the assets, estimated to be 40 to 50 years for buildings and 3 to 10 years for furniture and equipment. Gains or losses realized on the disposition of premises and equipment are reflected in the consolidated statement of income.

Other Real Estate Owned

Other real estate owned includes properties that have been acquired in complete or partial satisfaction of debt. These properties are initially recorded at fair value on the date of acquisition, establishing a new cost basis. Subsequent to acquisition, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value, less estimated costs to sell. Gains and losses realized on the sale are included in noninterest income. Net costs of maintaining and operating the properties are expensed as incurred.

Goodwill

The Company utilizes a two-step process for testing the impairment of goodwill on at least an annual basis. This approach could cause more volatility in the Company's reported net income because impairment losses, if any, could occur irregularly and in varying amounts. The Company may also perform a qualitative assessment to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying value. Based on the fair value of the reporting unit, no impairment of goodwill was recognized in 2021.

Federal Income Taxes

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. A deferred tax liability or deferred tax asset is computed by applying the current statutory tax rates to net taxable or deductible temporary differences between the tax basis of an asset or liability and its reported amount in the financial statements that will result in net taxable or deductible amounts in future periods. Deferred tax assets are recorded only to the extent that the amount of net deductible temporary differences or carryforward attributes may be utilized against current period earnings, offset against taxable temporary differences reversing in future periods, or utilized to the extent of management's estimate of future taxable income. A valuation allowance is provided for deferred tax assets to the extent that the value of net deductible temporary differences and carryforward attributes exceeds management's estimates of taxes payable on future taxable income. Deferred tax liabilities are provided on the total amount of net temporary differences taxable in the future.

The provisions of "Accounting for Uncertainty in Income Taxes" prescribe a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more likely than not to be sustained upon examination by taxing authorities. The amount recognized is measured as the amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

Comprehensive Income

The Company is required to present comprehensive (loss) income and its components in a full set of general-purpose financial statements for all periods presented. Other comprehensive (loss) income comprises unrealized holding gains and losses on the available-for-sale securities portfolio.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when: 1) the assets have been isolated from the Company, 2) the transferree obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and 3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Advertising Costs

Advertising costs are expensed as incurred. Advertising expenses were \$13,000 and \$2,000 for the years ended December 31, 2021 and 2020, respectively.

Treasury Stock

Common stock and preferred shares repurchased are recorded as treasury stock at cost.

Earnings per Share

The Company maintains a simple capital structure with no stock plans that would have a dilutive effect on earnings per share. Earnings per share is calculated by dividing net income less preferred dividends by the weighted average number of shares outstanding for the periods.

Reclassification of Comparative Amounts

Certain comparative amounts for the prior year have been reclassified to conform to current-year presentation. Such reclassifications had no effect on net income or stockholders' equity.

2. REVENUE RECOGNITION

The primary sources of revenue for the Company are from interest and dividend income on loans and securities along with noninterest revenue resulting from investment security gains, loan servicing, gains on the sale of loans, commitment fees, fees from financial guarantees, certain credit cards fees, and income on bank-owned life insurance that are not within the scope of ASC 606. These sources of revenue cumulatively comprise 97 percent of the total revenue of the Company. Services within the scope of ASC 606 include income from fiduciary activities, service charges on deposit accounts, other service income, and gain on sale of OREO, net. For these accounts, fees related to specific customer transactions are attributable to specific performance obligations of the Company where the revenue is recognized at a defined point in time, completion of the requested service/transaction.

3. INVESTMENT SECURITIES

	\$	150	\$	(3) \$	586	9	\$ (4) \$	736	\$	(7)
Mortgage-backed securities		-		-	313		(7)	313		(7)
	\$	150	\$	(3) \$	899	- {		1,049	\$	(14)

The Company reviews its position quarterly and has asserted that at December 31, 2021, the declines outlined in the above table represent temporary declines, and the Company does not intend to sell, and it is more likely than not that the Company will not be required to sell the securities before their anticipated recovery in fair value. The number of securities that have been in a continuous unrealized loss position for less than 12 months and for more than 12 months is 15 and 9, respectively, at December 31, 2021. The Company has concluded that the unrealized losses disclosed above are not other than temporary but are the result of interest rate changes, sector credit ratings changes, or Company-specific ratings changes that are not expected to result in the noncollection of principal and interest during the period.

The amortized cost and fair value of investment securities at December 31, 2021, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	_	Availal	ble f	or Sale	Held to Maturity					
		Amortized		Fair		Amortized		Fair		
	_	Cost		Value		Cost		Value		
Due in less than one year	\$	1,501	\$	1,521	\$	-	\$	-		
Due after five years through ten years		5,683		5,626		1,250		1,279		
Due after ten years	_	2,358		2,360		-				
Total	\$	9,542	\$	9,507	\$	1,250	\$	1,279		

During 2021, the Company did not sell any available-for-sale securities.

During 2020, the Company sold available-for-sale securities for total proceeds of \$8,395,000, resulting in gross realized gains of \$211,000.

Investment securities with a carrying value of \$6.1 and \$6.2 million at December 31, 2021 and 2020, respectively, were pledged to secure public deposits, collateral for borrowings, and other purposes as required by law.

4. LOANS

Major classifications of loans held for investment are summarized as follows:

	December 31,					
		2021	2020			
		(In thousa	nds)			
Real estate mortgage	\$	43,037 \$	41,677			
Construction and development		8,450	3,956			
Commercial real estate		17,728	20,536			
Commercial and industrial		3,288	3,939			
Home equity lines of credit		1,734	2,120			
Deposit secured		82	84			
Total		74,319	72,312			
Less allowance for loan losses		577	557			
Net loans	\$	73,742 \$	71,755			

In the ordinary course of business, the Company has granted loans to some of its officers, directors, and their related interests. Related-party loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated persons and do not involve more than normal risk of collectability. The aggregate dollar amount of these loans was approximately \$952,000 and \$931,000 at December 31, 2021 and 2020, respectively. During the years ended December 31, 2021 and 2020, loans or additional draws on home equity lines of credit of \$148,000 and \$54,000, respectively, were made to officers, directors, and their related interests, while principal repayments of \$127,000 and \$112,000 were received from related parties during 2021 and 2020, respectively.

The Company's lending efforts have historically focused on one-to-four family residential real estate loans and construction loans, which comprise approximately \$43.0 million, or 61.3 percent, of the total loan portfolio at December 31, 2021, and \$41.7 million, or 57.6 percent, of the total loan portfolio at December 31, 2020. Historically, such loans have been underwritten with cash down payments sufficient to provide the Company with adequate collateral coverage in the event of default. Nevertheless, the Company, as with any lending institution, is subject to the risk that real estate values or economic conditions could deteriorate in its primary lending areas within Ohio, thereby impairing collateral values.

During 2020, the Company participated in the Paycheck Protection Program (PPP), administered directly by the U.S. Small Business Administration (SBA). The PPP provides loans to small businesses who were affected by economic conditions as a result of COVID-19 to provide cash flow assistance to employers who maintain their payroll (including healthcare and certain related expenses), mortgage interest, rent, leases, utilities, and interest on existing debt during the COVID-19 emergency. As of December 31, 2020, all three of the PPP loans were forgiven by the SBA.

In accordance with the SBA terms and conditions on these PPP loans, the Company received approximately \$5,300 in fees associated with the processing of these loans. Upon funding of the loan, these fees, less related costs, were deferred and were recognized upon forgiveness as an adjustment to yield in accordance with FASB ASC 310-20-25-2.

5. ALLOWANCE FOR LOAN LOSSES

The following table shows the allowance for loan losses and recorded investment in loans for the year ended:

Credit Quality Information

Credit quality indicators by internally assigned grade, are as follows:

Pass – loans in this category have strong asset quality and liquidity along with a multi-year track record of profitability.

Special mention – loans in this category are currently protected but are potentially weak. The credit risk may be relatively minor, yet constitute an increased risk in light of the circumstances surrounding a specific loan.

Substandard – loans in this category show signs of continuing negative financial trends and unprofitability and therefore, are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any.

The following tables present each loan class by credit quality indicator for the years ended December 31:

	_		2021			_		2020

	\$	418	\$	32	\$	441	\$	293			

Interest income on nonaccrual loans not recognized during 2021 and 2020 was \$40,000 and \$33,000, respectively.

Troubled Debt Restructuring

Consistent with accounting and regulatory guidance, the Company recognizes a troubled debt restructuring when the Company, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that would not normally be considered. Regardless of the form of concession granted, the Company's objective in offering a troubled debt restructuring is to increase the probability of repayment of the borrower's loan principal.

Section 4013 of the CARES Act provides that banks may elect not to categorize a loan modification as a TDR if the loan modification is (1) related to COVID-19; (2) executed on a loan that was not more than 30 days past due as of December 31, 2019; and (3) executed between March 1, 2020, and the earlier of (A) 60 days after the date on which the national emergency concerning the novel coronavirus disease (COVID-19) outbreak declared by the president on March 13, 2020, under the National Emergencies Act terminates, or (B) December 31, 2020. On April 7, 2020, federal banking regulators issued a revised interagency statement that included guidance on their approach for the accounting of loan modifications in light of the economic impact of the COVID-19 pandemic. The guidance interprets current accounting standards and indicates that a lender can conclude that a borrower is not experiencing financial difficulty if short-term modifications are made in response to COVID-19, such as payment deferrals, fee waivers, extensions of repayment terms, or other delays in payment that are insignificant related to the loans in which the borrower is less than 30 days past due on its contractual payments at the time a modification program is implemented.

According to the *Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus (Revised)* issued by the federal bank regulatory agencies on April 7, 2020, short-term loan modifications not otherwise eligible under Section 4013 that are made on a good faith basis in response to COVID-19 to borrowers who were current prior to any relief are not TDRs. This includes short-term (e.g., six months) modifications such as payment deferrals, fee waivers, extensions of repayment terms, or other delays in payment that are insignificant.

For the year ended December 31, 2021, the Company had completed loan payment deferrals or payments of interest only on 2 loans. As of December 31, 2021, all loans that had received payment deferrals or payments of interest only were again paying as contractually agreed. For the year ending December 31, 2020, the Company had completed loan deferrals or payments of interest only on ten loans. In accordance with Section 4013 of the CARES Act and the interagency guidance issued on April 7, 2020, these short-term deferrals are not considered troubled debt restructurings.

The Bank had loans of \$287,000 and \$185,000 modified as troubled debt restructurings during the years ended December 31, 2021 and 2020, respectively.

6. LIMITED PARTNERSHIP – OHIO EQUITY FUND

The Company holds an interest in a limited partnership formed to assist in the production, rehabilitation, and preservation of affordable housing in Ohio and surrounding states. The Company accounts for the investment in the limited partnership using the proportional amortization method, which allows the Company to amortize the cost of the investment in proportion to the tax credits and other tax benefits it receives to income tax expense. Management believes this is the best estimate of fair value. At December 31, 2021 and 2020, the amortized cost of the investment was \$559,000 and \$655,000, respectively. Under the terms of the limited partnership agreement, the Company agreed to a subscription price of \$1,000,000 executed by a capital contribution note.

7. OTHER REAL ESTATE OWNED

As of December 31, 2021 and 2020, the Company had no other real estate owned. As of December 31, 2021, there were no formal foreclosure proceedings initiated on loans.

8. PREMISES AND EQUIPMENT

Major classifications of premises and equipment are summarized as follows:

	December 31,						
	 2021		2020				
	(In thousands)						
Land	\$ 32	\$	32				
Building and building improvements	685		685				
Furniture and equipment	 290		257				
	1,007		974				
Less accumulated depreciation	 676		653				
Total	\$ 331	\$	321				

Depreciation and amortization charged to operations were \$37,000 and \$35,000 in 2021 and 2020, respectively.

9. **DEPOSITS**

Time deposits (in thousands) totaling \$35,776, \$7,435, \$2,087, \$59, \$483, and \$225 at December 31, 2021, mature during 2022, 2023, 2024, 2025, 2026 and 2027, respectively.

Substantially all deposits are interest bearing. The type of deposit accounts are summarized as follows:

	 2021		2020			
	 (In thousands)					
Savings and transaction accounts	\$ 34,542	\$	29,591			
Certificates of deposit	 46,065		36,676			
Total	\$ 80,607	\$	66,267			

Time deposits include certificates of deposit and other time deposits in denominations equal to or in excess of \$250,000. Such deposits aggregated to \$22.9 million and \$15.2 million at December 31, 2021 and 2020, respectively.

10. FEDERAL INCOME TAXES

Income tax expense consists of the following at December 31:

	 2021	2020
	(In tho	usands)
Current	\$ 168 3	98
Deferred	(36)	(44)
Total	\$ 132	54

2020

The reconciliation of income tax provision computed at the federal statutory rate to the Company's effective income tax provision is as follows:

-	202	1	202	020			
		% of Pretax		% of Pretax			
	Amount	Income	Amount	Income			
	 	(In thousan	ids)				
Provision at statutory rate	\$ 151	21.0 % \$	75	21.0 %

Bank-owned life insurance, net	(14)	(1.9)	(13)	(3.6)			
Other	 (5)	(0.7)					
Actual tax expense and							
effective rate	\$ 132	<u>18.4</u> % \$	54	15.2 %			

10. FEDERAL INCOME TAXES (Continued)

The components of the net deferred federal income tax asset are as follows:

	2021		2020
	(In thousands)		
Deferred tax assets:			
Allowance for loan losses	\$ 121	\$	117
Imputed loan interest	71		63
Net unrealized losses on investment securities	8		-
Net operating loss and credits carry forward	574		538
Gross deferred tax assets	774		718
Deferred tax liabilities:			
Net unrealized gain on investment securities	-		(25)
FHLB stock dividends	(132)		(132)
Depreciation	(10)		(10)
Other	 (215)		(131)
Gross deferred tax liabilities	 (357)		(298)
Net deferred tax assets	\$ 417	\$	420

At December 31, 2021, the Company had approximately \$516,000 in net operating loss carryforwards which begin to expire in 2034.

The amount of federal income tax expense attributable to continuing operations may differ from the amount of expense that would result from applying domestic federal statutory rates to pre-tax income from continuing operations primarily due to statutory deduction limitations.

The Company was previously allowed a special bad debt deduction based on a percentage of earnings, generally limited to 8 percent of otherwise taxable income, or the amount of qualifying and nonqualifying loans outstanding and subject to certain limitations based on aggregate loans and savings account balances at the end of the calendar year. If the amounts that qualified as deductions for federal income tax purposes are later used for purposes other than for bad debt losses, including distributions in liquidation, such distributions will be subject to federal income taxes at the then current corporate income tax rate. Retained earnings at December 31, 2021, includes approximately \$2.5 million for which federal income taxes have not been provided. The amount of the unrecognized deferred tax liability relating to the cumulative percentage of earnings bad debt deduction totaled approximately \$525,000 at December 31, 2021.

There is currently no liability for uncertain tax positions and no known unrecognized tax benefits. The Company recognizes, when applicable, interest and penalties related to unrecognized tax benefits in the provision for income taxes in the Consolidated Statement of Income. With few exceptions, the Company is no longer subject to U.S. federal, state, or local income tax examinations by tax authorities for years before 2018.

11. BORROWED FUNDS

Federal Home Loan Bank (FHLB) advances are secured by \$2.6 million of investment securities held in safekeeping at the FHLB and qualifying one-to-four family residential loans up to 125 percent of outstanding advances, or \$27.1 million at December 31, 2021, and \$30 million at December 31, 2020. Advances issued by the FHLB are at either a variable or fixed rate of interest. Additionally, some advances have a fixed rate for an initial period until a quarterly option exercisable by the FHLB may convert the issue to a variable rate. Other advances have a fixed rate for an initial period until a quarterly put option exercisable by the FHLB would subject the advance to repayment or refinancing at prevailing interest rates. Each convertible advance is subject to a prepayment penalty if paid prior to its maturity date, except when prior to maturity, an advance is converted to a variable rate. In the event of such conversion, the advance may be prepaid without penalty at conversion and on a quarterly basis thereafter. Each fixed rate or putable advance is subject to a prepayment penalty if paid prior to its maturity or put date, as applicable. Cash management advances may be prepaid at any time without penalty.

The Company has a blanket credit arrangement with the FHLB with a maximum borrowing capacity of approximately \$41.9 million at December 31, 2021. This credit arrangement is subject to annual renewal, incurs no service charges, and is secured by the Bank's FHLB stock and certain first mortgage loans.

The following table summarizes the advances as of December 31:

			At Decembe	er 31,
Description Maturity		Interest Rate	2021	2020
			(In thousan	ds)
Fixed rate	February 2021	0.51	-	5,000
Fixed rate	March 2021	1.87	-	1,000
Fixed rate	January 2022	2.09	2,000	2,000
Variable	February 2022	0.23	2,100	-
Variable	March 2022	0.23	1,000	-
Fixed rate	April 2022	2.47	2,000	2,000
Fixed rate	December 2022	2.48	1,000	1,000
Fixed rate	January 2023	2.36	2,000	2,000
Fixed rate	January 2023	2.08	2,000	2,000
Fixed rate	December 2023	2.54	1,500	1,500
Fixed rate	April 2024	2.55	2,000	2,000
Fixed rate	June 2024	2.15	1,000	1,000
Fixed rate	August 2024	1.82	1,500	1,500
Fixed rate	January 2025	1.76	2,000	2,000
Fixed rate	January 2025	1.61	1,000	1,000
Fixed rate	February 2025	2.43	3,000	3,000
Fixed rate	December 2028	3.46	1,000	1,000
Fixed rate	June 2038	3.77	1,000	1,000
Fixed rate	June 2039	3.04	1,000	1,000
		\$	27,100 \$	30,000

The weighted-average interest rate is 2.13 percent at December 31, 2021.

The note payable to The Ohio Equity Fund had a balance of \$116,000 and \$147,000 as of December 31, 2021 and 2020, respectively, with a maturity of December 2026. Principal payments totaling \$24,000, \$22,000, \$22,000, \$22,000, and \$26,000 at December 31, 2021, mature during 2022, 2023, 2024, 2025, and thereafter.

11. BORROWED FUNDS (Continued)

The Company maintains \$7.0 million unsecured lines of credit with two other financial institutions. The Company also maintains a \$2.5 million secured line of credit with a third financial institution. At December 31, 2021 and 2020, the lines of credit were not used and were fully available.

12. EMPLOYEE BENEFITS

The Company contributed \$99,000 and \$25,000 to their 401(k) plan in 2021 and 2020, respectively.

13. LEASE OBLIGATIONS

The Company leases offices in Hudson, Mentor, and Westlake for its mortgage banking activities under operating leases expiring in 2022, 2026, and 2031, respectively. Future minimum rentals under the leases are as follows:

Minimum Rentals
(in thousands)
\$ 188
183
187
190
167
<u>539</u>
\$ <u>1,454</u>

Rent expense for the period ended December 31, 2021, was \$51,000.

14. PREFERRED STOCK

On December 22, 2006, pursuant to the common stockholders' approval, 30,119 preferred shares were issued in exchange for outstanding common shares, on a one-for-one basis, to all common shareholders of record owning 300 or less shares.

Shareholders owning the Series A Preferred Stock are entitled to a 5 percent preference in the distribution of dividends when and if declared on the common stock. Shareholders owning preferred stock do not have voting rights except for matters pertaining to change in control, such as merger, share exchange or sale of substantially all Company assets. The Series A Preferred Stock automatically converts to shares of Common Stock immediately prior to a change in control.

15. ACCUMULATED OTHER COMPREHENSIVE INCOME

The following table presents the changes in accumulated other comprehensive income (loss) by component net of tax for the years ended December 31, 2021 and 2020.

	Net Unrealized Gain (Loss) on Securities
Accumulated other comprehensive income, December 31, 2019	5
Other comprehensive income before reclassification and accretion (net of tax)	260
Amounts reclassified from accumulated other comprehensive income	(167)
Total other comprehensive income	93
Accumulated other comprehensive income, December 31, 2020 \$	98
Total other comprehensive loss	(125)
Accumulated other comprehensive loss, December 31, 2021 \$	(27)

There were no amounts reclassified out of accumulated other comprehensive income (loss) as of December 31, 2021. The following table presents the significant amounts reclassified out of each component of accumulated other comprehensive income as of December 31, 2020.

		December 31, 2020				
		Amount	Affected line on the			
Net unrealized gain on investment securities	\$ \$_	211 (44) 167	Gains on sale of securities Federal income tax expense			

(a) Amounts in parenthesis indicate debits to net income

16. COMMITMENTS

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers including commitments to extend credit. Such commitments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amount recognized in the statement of financial condition. The contract or notional amounts of the commitments reflect the extent of the Company's involvement in such financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual notional amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as those utilized for onbalance-sheet instruments.

At December 31, 2021, the Company had outstanding commitments of approximately \$1.6 million of variable rate home equity lines of credit, \$1.3 million of commercial lines of credit, and \$1.9 million of construction loans. The average interest rate of the lines of credit was 4.90 percent at December 31, 2021. In the opinion of management, the outstanding loan commitments equaled or exceeded prevalent market interest rates and such loans were underwritten in accordance with normal underwriting policies, and all commitments will be funded via cash flow from operations and existing excess liquidity.

At December 31, 2020, the Company had outstanding commitments of approximately \$2.5 million of variable rate home equity lines of credit, \$800,000 of commercial lines of credit, and \$2.1 million of construction loans. The average interest rate of the lines of credit was 4.94 percent at December 31, 2020. In the opinion of management, the outstanding loan commitments equaled or exceeded prevalent market interest rates and such loans were underwritten in accordance with normal underwriting policies, and all commitments will be funded via cash flow from operations and existing excess liquidity.

From time to time, and in the ordinary course of business, the Company becomes a party to litigation. In the opinion of management, after consultation with legal counsel, the ultimate disposition of any current claim, asserted or unasserted, is not expected to have a material effect on the Company's consolidated financial statements.

17. FAIR VALUE MEASUREMENTS

The following disclosures show the hierarchal disclosure framework associated with the level of pricing observations utilized in measuring assets and liabilities at fair value. The three broad levels of pricing observations are as follows:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than the quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently and items that are fair-valued using other financial instruments, the parameters of which can be directly observed.

Level III: Valuations are derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires the use of observable market data, when available.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

17. FAIR VALUE MEASUREMENTS (Continued)

Financial Assets and Liabilities Measured on a Recurring Basis

Assets measured at fair value on a recurring basis are as follows:

		December 31, 2021						
		Level I		Level II		Level III		Total
				(In	thou	sands)		_

17. FAIR VALUE MEASUREMENTS (Continued)

Financial Instruments:

The fair values of the Company's financial instruments not required to be reported at fair value are as follows:

1	J			1		1			
	_				Dec	cember 31,2021			
		Carrying		Fair					
	_	Value	_	Value	_	Level I	Level II	_	Level III
Financial assets:									
Investment securities:									
Held to maturity	\$	1,250	\$	1,279	\$	- \$	1,279	\$	-
Net loans		77,866		78,731		-	-		78,731
Financial liabilities:									
Deposits	\$	80,607	\$	80,643	\$	34,542 \$	-	\$	46,101
Federal Home Loan Bank Advances									
and notes payable		27,216		27,906		-	-		27,906
					Dec	cember 31,2020			
		Carrying		Fair					
		Value	_	Value	_	Level I	Level II		Level III
Financial assets:									_
Investment securities:									
Held to maturity	\$	1,250	\$	1,259	\$	- \$	1,259	\$	-
Net loans		71,755		72,398		-	-		72,398
Financial liabilities:									
Deposits	\$	66,267	\$	66,568	\$	29,591 \$	-	\$	36,977
Federal Home Loan Bank Advances									
and notes payable		30,147		31,582		-	-		31,582

For cash and cash equivalents, certificates of deposits, BOLI, Federal Home Loan Bank stock, accrued interest receivable, and accrued interest payable, the carrying value is reasonable estimate of fair value.

18. REGULATORY CAPITAL

Federal regulations require the Company and the Association to maintain minimum amounts of capital. Specifically, the Company is required to maintain certain minimum dollar amounts and ratios of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average total assets. Management believes, as of December 31, 2021 and 2020, the Company meets all capital adequacy requirements to which it is subject.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Association to maintain minimum amounts and ratios (set forth in the following table) of total, Tier 1 capital and common equity Tier 1 (as defined in the regulations) to risk-weighted assets, and of Tier 1 capital to average assets. Management believes, as of December 31, 2021, that the Company and the Association meet all capital adequacy requirements to which they are subject.

As of December 31, 2021 and 2020, the OCC categorized the Company as well capitalized under the regulatory framework for prompt corrective action. To be classified as a well-capitalized financial institution, common equity Tier 1 risk-based, Total risk-based, Tier 1 risk-based, and Tier 1 leverage capital ratios must be at least 6.5 percent, 10 percent, 8 percent, and 5 percent, respectively.

In November 2019, federal bank regulatory agencies finalized a rule that simplifies capital requirements for community banks by allowing them to optionally adopt a simple leverage ratio to measure capital adequacy, which removes requirements for calculating and reporting risk-based capital ratios for a qualifying community bank that has less than \$10 billion in total consolidated assets, limited amounts of off-balance-sheet exposures and trading assets and liabilities, and a leverage ratio greater than 9 percent. The community bank leverage ratio framework was effective on January 1, 2020. The Company elected to adopt the optional community bank leverage ratio framework in the first quarter of 2020. The Company did not meet the requirements pertaining to off-balance-sheet exposures beginning in the third quarter of 2021 when it acquired Union Capital.

In April 2020, the federal banking regulatory agencies modified the original community bank leverage ratio (CBLR) framework and provided that, as of the second quarter 2020, a banking organization with a leverage ratio of 8 percent or greater and that meets the other existing qualifying criteria may elect to use the community bank leverage ratio framework. The modified rule also states that the community bank leverage ratio requirement will be greater than 8 percent for the second through fourth quarters of calendar year 2020, greater than 8.5 percent for calendar year 2021, and greater than 9 percent thereafter. The transition rule also maintains a two-quarter grace period for a qualifying community banking organization whose leverage ratio falls no more than 100 basis points below the applicable community bank leverage ratio requirement.

18. REGULATORY CAPITAL (Continued)

As of December 31, 2021 and 2020, management believes that the Company met all capital adequacy requirements to which it was subject.

The Company's management believes that, under the current regulatory capital regulations, the Company will continue to meet its minimum capital requirements in the foreseeable future. However, events beyond the control of the Company, such as increased interest rates or a downturn in the economy in the primary market area, could adversely affect future earnings and, consequently, the ability to meet future minimum regulatory capital requirements.

The Association is subject to regulations imposed by the OCC regarding the amount of capital distributions payable to the Company. Generally, the Association's payment of dividends is limited, without prior OCC approval, to net earnings for the current calendar year plus the two preceding calendar years, less capital distributions paid over the comparable time period. Insured institutions are required to file an application with the OCC for capital distributions in excess of this limitation. The Association must also give notice to the Federal Reserve Bank of Cleveland for approval prior to declaring a dividend to the Company.

19. ACQUISITION OF UNION CAPITAL MORTGAGE CORPORATION

In the third quarter of 2021, the Company announced the signing of a definitive merger agreement to acquire 100 percent of the outstanding equity interest of Union Capital Mortgage Corporation ("Union Capital") for \$3.3 million in cash and stock. Union Capital was an Ohio Corporation that will continue to conduct its mortgage banking business from offices located in Mentor, Westlake, and Hudson, Ohio.

The transaction closed on August 2, 2021, resulting in Union Capital becoming a wholly-owned subsidiary of Home Federal.

Under the terms of the merger agreement, the Company acquired all of the outstanding shares of Union Capital for a total purchase price of approximately \$3.3 million. As a result of the acquisition, the Company issued 220,000 common shares and \$1.1 million in cash to the former shareholders of Union Capital. The shares were issued with a fair value of \$10.12 per share, which was based on the closing price of the Company's stock on August 2, 2021.

The acquired assets and assumed liabilities were measured at estimated fair values. Management made significant estimates and exercised significant judgment in accounting for the acquisition. Management measured loan fair values based on loan file reviews, appraised collateral values, expected cash flows, and historical loss factors of Union Capital.

None of the loans acquired in the business combination were deemed to exhibit evidence of credit quality deterioration. Union Capital's loans would have been deemed to have credit impairment at the acquisition date if the Company did not expect to receive all contractually required cash flows due to concerns about credit quality.

Union Capital's loans were fair valued by discounting both expected principal and interest cash flows using an observable discount rate for similar instruments that a market participant would consider in determining fair value. Additionally, consideration was given to management's best estimates of default rates and pre-payment speeds.

The following table summarizes the purchase of Union Capital as of August 2, 2021:

	(In Thousands, Exce	ept Share and	Per share Data)
Purchase Price Consideration in Common Stock			
First Niles Financial, Inc. shares issued		220,000	
Value assigned to First Niles Financial, Inc. common share	\$	10.12
